Routed Parts and Worked Hard at MURA!

The router has been very busy this week machining aluminum into a variety of parts. On the right and below you can see examples of two parts we have machined, bumper supports and gussets.

Bumper supports machined on the router

Gussets machined on the router

Over the long weekend, we made tremendous progress towards completing the practice field at MURA in collaboration with other FRC teams. Ultraviolet, Herobotics, Green Machine, and the MinuteBots completed the power port (the hexagonal hole in the back of the field in the photo), the Loading Bay (the three small squares to the left of the power port), and the frame of the shield generator (the big frame in the foreground). A big thanks to everyone that worked on the field and made such great progress!
