Southwest High School FIRST Robotics

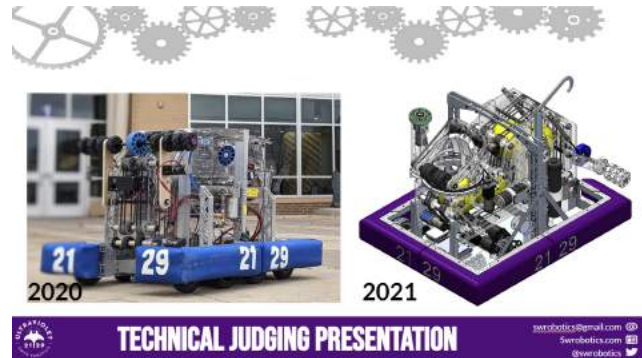

Monthly Newsletter - Month of April 2021

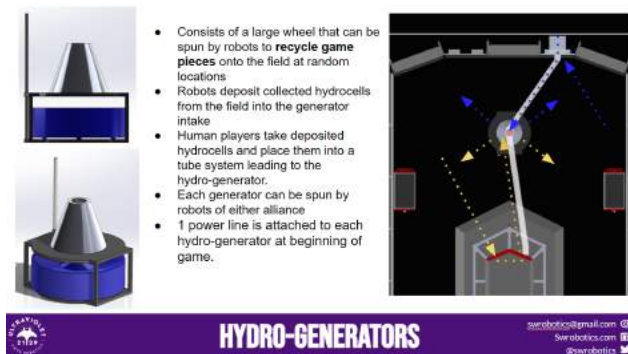

Written by Elsa A. & Cole K.

Judging Phase Complete!

Before spring break we presented for the Game Design Challenge and the Robot Technical Awards. Our presentations were showing all the work we have been doing for the last few months. After putting together our updated robot designs and the game we designed along with the game rules, we showed our work to judges. Example photos of the slideshows the subteams put together can be seen to the right and below. Both teams did very well and

we hope to learn how we did soon.

This spring we will be training new members and our current underclassmen. The teams will be meeting once a week with additional smaller meetings to focus on specific subjects. This is a great time to join as we will be taking the time to go in-depth through all of the sub-teams and then hosting hands-on learning experiences. During this time seniors will be sharing their words of wisdom before they leave Southwest.

As students are going back to school we will still be holding our meetings virtually, but we have plans for this summer. Over the summer we will be holding meetings in the school's workshop. We will be working in small groups to practice programming robots and building the elements which make a robot move and be able to navigate. That's all for this month! Tune in next month for more updates!
